

(a) Trend revision

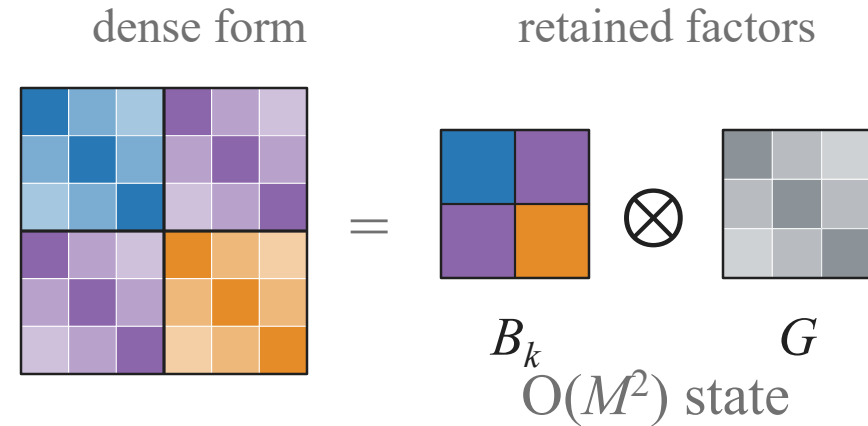

$$\Delta h_u = -\mathbf{R}_{u\beta} \Delta \beta$$

(b) Changing coordinates

$$(R, r) \rightarrow (M^T R M, M^T r)$$

(c) Structured recovery

$$R_{uu,k} = B_k \otimes G$$

Schur–Sylvester solve $\rightarrow q_k(\beta, u_k)$

$O(M^3)$ time
